BULBS FOR SPRING
PLANTING.

2431 2187

2011 0111 11

2431 2187

BY ROYAL WARRANT
TO HIS MAJESTY KING GEORGE V.

A SPECIAL LIST OF
GLADIOLUS, LILIES,
AND OTHER BULBS,
**TO PLANT IN EARLY SPRING FOR SUMMER
AND AUTUMN FLOWERING.**

James Baxter & Co

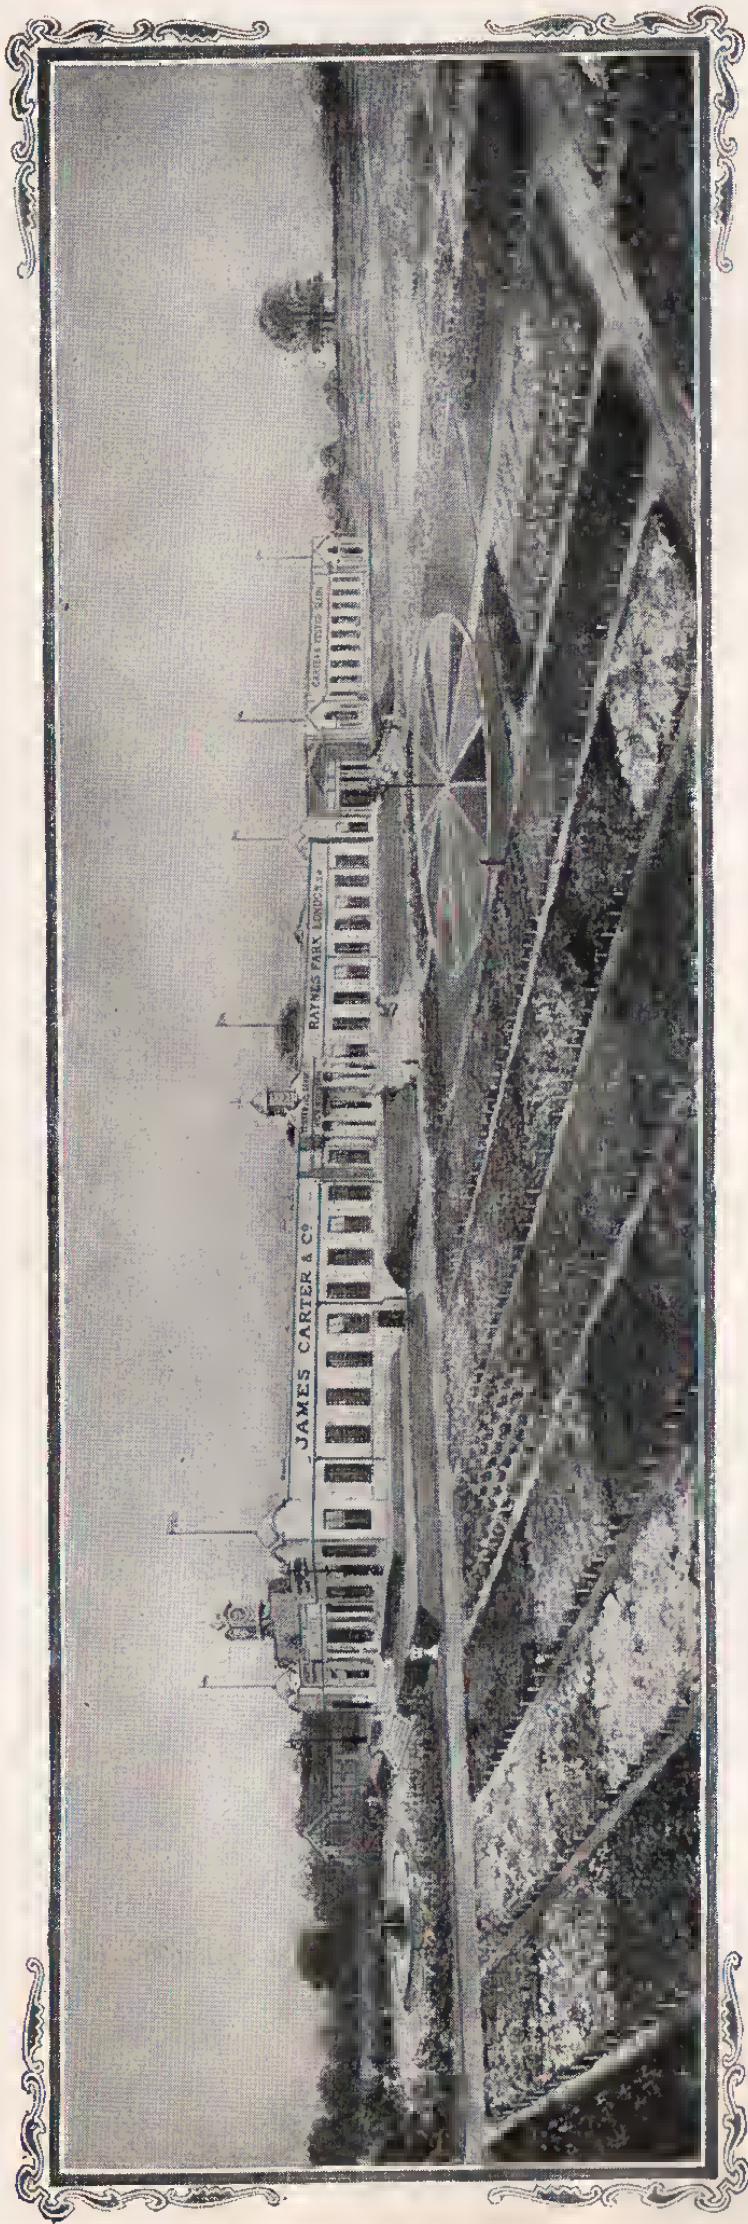

Seedsman to His Majesty the King,

RAYNES PARK, LONDON, S.W.

BY ROYAL WARRANT
TO H.M. QUEEN ALEXANDRA.

JANUARY, 1914.

THE HOME OF CARTERS TESTED SEEDS.

"The Laboratories are equipped with the latest appliances for testing all kinds of Seeds—a process to which great importance is attached."

The Times, Feb. 5th, 1912.

"In all that pertains to Seeds, the name of James Carter & Co. has for almost a century been a household word."

The Daily Telegraph, Jan. 26th, 1912.

Some Proportions of Carters New Fire-proof Premises :—

The Main Buildings are 742 feet long, the letters on the buildings are each 5 feet high, the clock dial is 5 feet in diameter, and the floor space covers several acres.

"One of the most interesting processes of the business is to be found in the Laboratories, where samples of every seed are scientifically Tested. Seeds, indeed, sent out by Carter have little chance of causing disappointment, for they go through many Tests before they reach their final cultivator."

The Graphic, Feb. 17th, 1912.

CARTERS IMPROVED BUTTERFLY GLADIOLUS.

CARTERS IMPROVED BUTTERFLY GLADIOLUS.

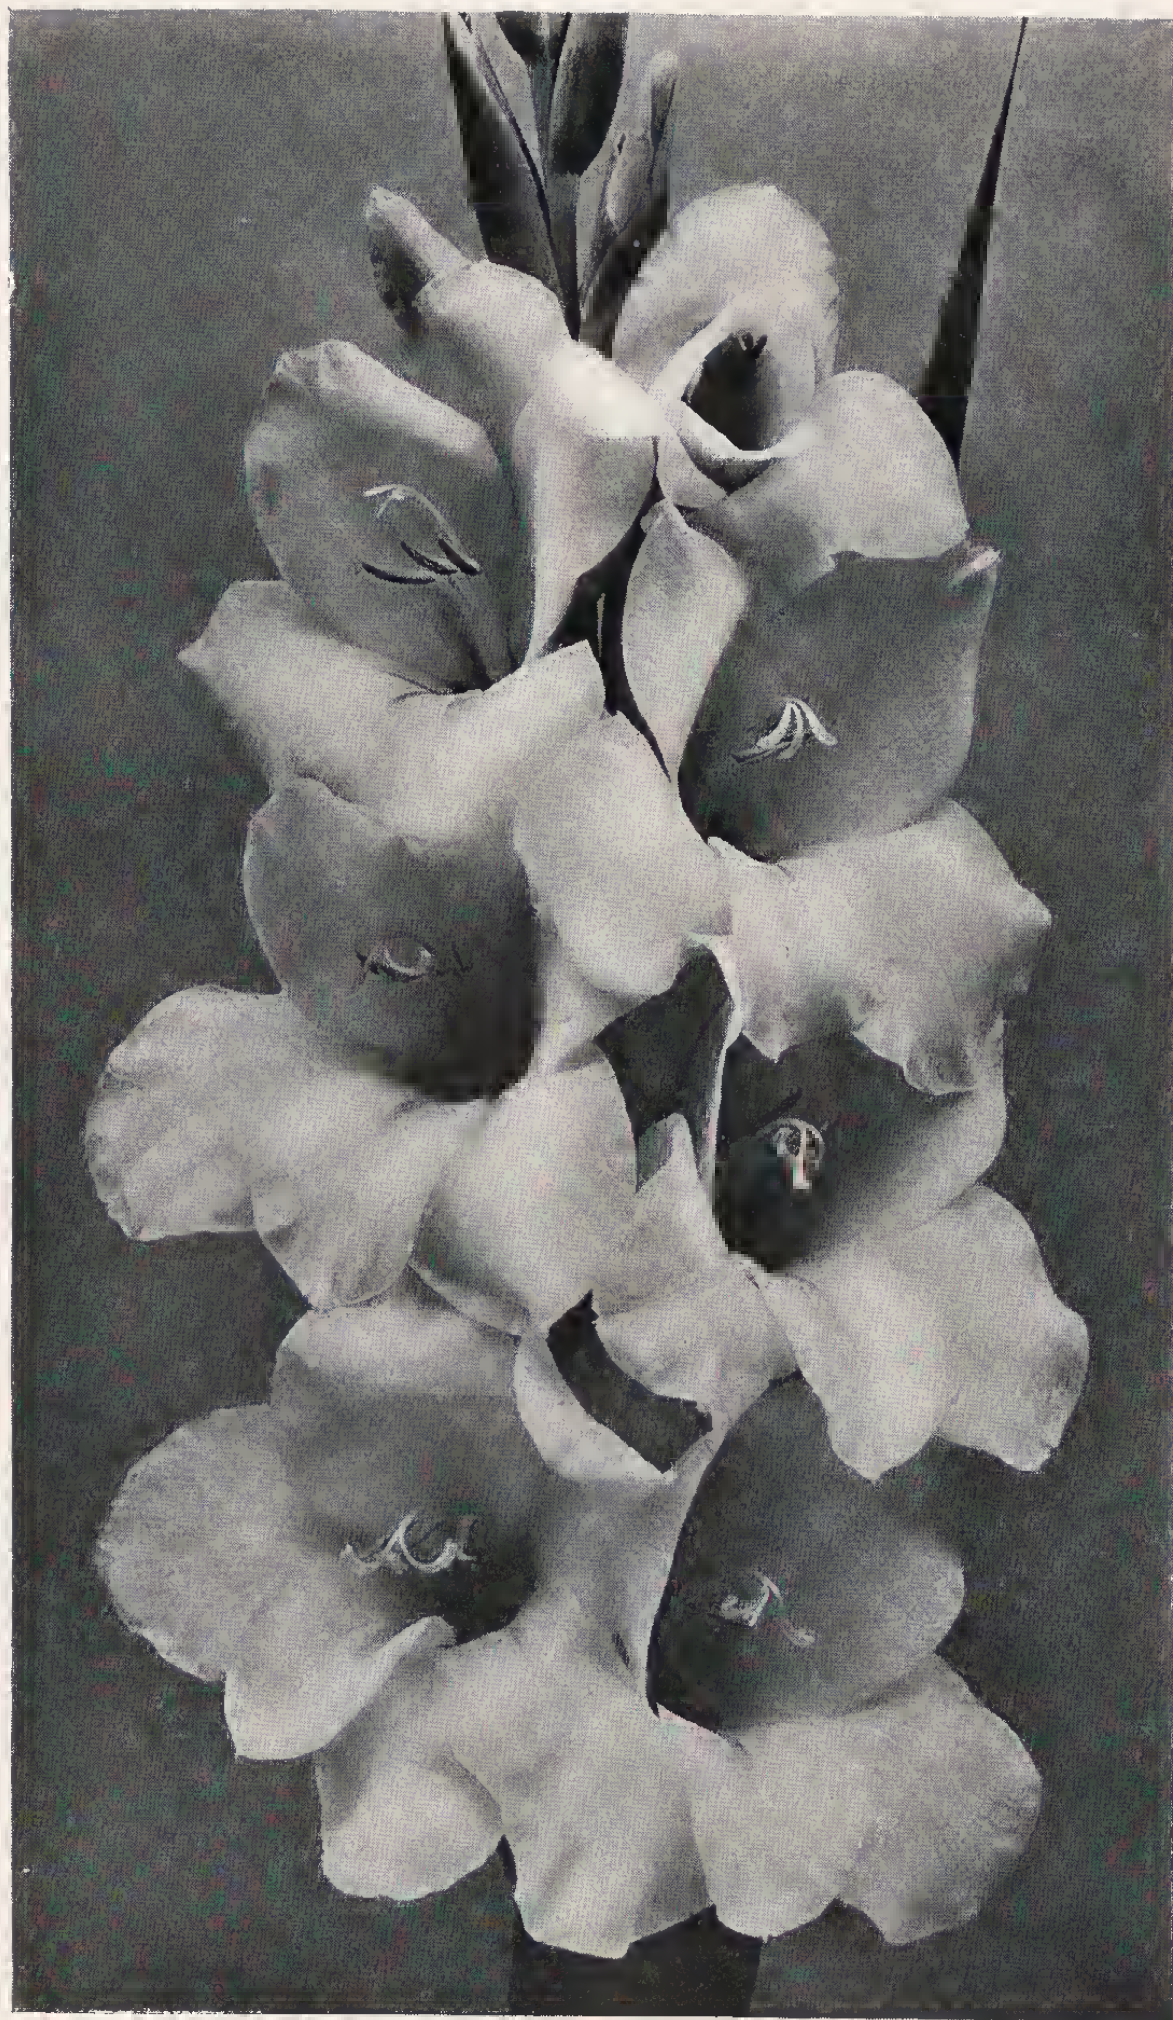

By carefully selecting those varieties planted specially for hybridisation, we claim to now offer absolutely the largest flowered and the grandest mixture of Gladiolus that has ever been produced.

Carters Improved Butterfly Gladiolus (*see Photograph*) now contains beautiful shades of carmine, scarlet, pink, cream, blue, and many others of the more delicate colours.

We strongly recommend this choice mixture to our customers, as we feel sure when once grown they will discard all other mixtures and give this the place of honour in their garden.

Strong Flowering Bulbs.

Price per 1,000, **140/-** ; per 100, **15/-** ; per doz. **2/-**.

ARUM.

Mrs. Roosevelt.—This is an exceedingly hardy and beautiful variety, producing handsome soft lemon-coloured flowers and foliage of dark green, marked with splendid transparent silver blotches, making it a most attractive plant for decorative purposes. We also recommend for outdoor cultivation, but roots must be lifted in the autumn. This variety is of quite recent introduction and attracted great attention at the International and Holland-House Shows, 1912. (see Photograph, page 20.)

LILIUM LANCIFOLIUM (*Speciosum*) RUBRUM.

Next to the **Lilium auratum** we must place the **Lancifolium** or **Speciosum**, so exquisite in form and so easily cultivated. Specimens may frequently be seen flowering abundantly from pots in the squares and on balconies in the very centre of London and other large cities late in summer, and coming at a time of year when flowers are somewhat scarce makes it doubly welcome. It thrives well out in the border, and, with its pure chaste white, crimson-spotted and rose-spotted flowers, is very attractive.

Rich crimson spots, 55/- per 100 ; 7/6 per doz. ; 9d. each.

Extra large bulbs, 80/- „ 10/6 „ 1/- „

ARUM, MRS. ROOSEVELT.

(Described and priced on page 15.)

AMARYLLIS.

The Amaryllis are a showy tribe of bulbous plants, and exceedingly effective for conservatory decoration. Pot up the dry bulbs when received in good loamy soil, and expect them to bloom the following summer, or earlier if pushed on in heat. When potting, use a compost of turfy loam and leaf-mould, coarse sand, and well-rotted cow dung.

MONARCH OF THE EAST (see Photograph),

A Curious Plant from Central Asia.

(As originally named and offered by us.)

This remarkable plant exhibits one of those extraordinary traits in nature that few are able to understand, for the magnificent flowers actually come out of the dry bulb without being placed in soil and water.

The flower sheath sometimes reaches a length of nearly two feet, is of a red-brown colour, tipped with red and yellow, whilst the inner parts of the flower are equally as brilliant. The bulb of this extraordinary plant needs only to be placed in some fancy receptacle, *without water*, in a warm room, or on the mantelshelf, when without showing either leaves or roots, the flower makes its appearance, early in the year, thriving entirely upon the nourishment contained within the bulb.

Large bulbs, 9d. each ; 7/6 per doz.

Decorated China Bowls for placing these bulbs in, price, 6d., 9d., and 1/- each.

22 **CARTERS "EMPRESS" POPPY ANEMONES.**

EMPRESS POPPY ANEMONE.

The flowers are of immense size (often measuring 4 ins. in diameter) and great substance, invaluable for cutting and decorative purposes generally, and the very moderate price at which they are offered admits of their being extensively used for the decoration of the shrubbery border, where a constant and brilliant display can be produced from the end of May and throughout June.

Price,
per 1,000, 75/- ;
per 100, 8/6 ;
per doz., 1/3.

CARTERS "ST. BRIGID" ANEMONE.

The True Irish Strain.

This beautiful strain, raised originally in Ireland, and first brought into prominence by our House, deserves more than passing notice. The flowers are semi-double, most varied and beautifully coloured, and if cut before fully out, are most useful for decorative purposes.

Carters RAYNES PARK, LONDON, S.W.

BEGONIAS.

THE BEGONIA has become quite popular in recent years. One can hardly wonder, when it is considered how much skill has brought this about in improving the size of the flowers and the general habit of the plant. The "**Crown Jewels**" Begonia represents one of the most advanced strains of the day. In addition to the tuberous bulbs as offered below, Begonias may be raised from seeds sown in spring to make flowering plants in the year following, or from dormant tubers potted up in spring in rich soil composed of sandy loam and manure. They are now largely used for bedding purposes, and very effective they look in such situations through the summer months, lasting on until autumn. As soon as they lose their foliage at that season, the tubers should be lifted and stored away in a shed, either mixed with dry soil, cocoa-nut fibre, or covered with straw. Directly they start into new life in the spring, pot them up, and they will quickly come along and be useful for conservatory decoration during the summer or planted out in beds. Begonias will thrive in any good rich porous soil; but what we recommend is, two parts fibrous loam, two parts leaf mould, and one part well rotted stable manure; with a liberal addition of sand, and the pot should be well drained. Few plants are more sensitive during the young stages, either in regard to over-watering or in being allowed to become too dry.

CARTERS NEW FRINGED BEGONIA.

A magnificent single strain for bedding or for pots.

Flowers very large and of great substance, with the edges of each petal beautifully frilled or fringed. A great improvement on the ordinary single Begonia.

CARTERS LILY OF THE VALLEY. Please see page opposite.

LILY OF THE VALLEY.

A crown is the description given to a single rootlet. They are generally sold in bunches of 25, and are the best for pots and forcing. When throwing up blossoms grown in this manner, they are most serviceable in a number of ways for decorative purposes. A clump is a large conglomerated mass of roots that will throw up a quantity of flower spikes, either forced or when planted out of doors. Clumps are preferred for a permanent bed in the garden.

Carters Finest Selected Crowns, for forcing. In bundles of 25, per 1,000, 100/- ; per 100, 10/6 ; per 25, 2/9.

Good Flowering Crowns. Per 1,000, 75/- ; per 100, 8/6 ; per 25, 2/6.

Fortin's Giant, the largest and most beautiful strain. This variety, however, will not force, and can only be brought on slowly to insure its reaching perfection. Price, 16/- per 100 ; per doz., 2/3.

Imported Clumps, for open ground. Very fine, per doz, 12/6 ; each, 1/3.

RETARDED LILY OF THE VALLEY.

By availing ourselves of the modern method of cold storage, we are enabled to supply forcing roots of this pretty decorative plant through the winter months. One advantage these retarded roots have over those handled in the ordinary way is the quick time in which the flowers are produced. We have seen dormant crowns put into strong heat and brought into beautiful bloom within three weeks, but we recommend six weeks as the average time for a perfect flower spike.

We have made arrangements by which a continuous supply during winter may be assured.

Giant Flowering Retarded Crowns FOR ALL SEASONS. Per 1,000, 100/- ; per 100, 10/6 ; per bundle of 25, 2/9.

JAPANESE IRIS KÆMPFERI.

New Double Varieties.

The newer varieties of this King of Iris, recently introduced from Japan, are marvels of beauty and stateliness. Think of a plant sending up to a height of three feet a dozen flower spikes, each spike bearing from two to four enormous blossoms eight to ten inches across, and of the most delicate and beautiful colours, markings and combinations. Exceedingly valuable for cut flowers.

We offer large strong plants, which will all flower freely.

Named Varieties, 7/6 per doz. ; 9d. each.

PHYSALIS FRANCHETI.

New Giant Winter Cherry.

A beautiful improved form from Japan. Extra strong plants to flower the first year. <i>Quite hardy</i> ...	Per 100.		Per doz.

MONTBRETIAS.

The Montbretias are very valuable bulbous border plants, quite hardy, giving handsome spikes of bloom from early August for several weeks into the autumn ; the flowers are much used for decorative work, lasting a long time when cut. Plant from December to March.

HYACINTHUS CANDICANS.

A tall-growing bulbous plant, with long spear-like leaves. Planted in shrubberies or borders in autumn on rich soil, it throws up a candelabra-like spike of white bell-shaped flowers, which are very effective and make a splendid background for Gladioli. Height from 3 to 5 ft. Per 1,000, 65/- ; per 100, 7/6 ; per doz., 1/3.

SPIKE OF DOUBLE SWEET-SCENTED TUBEROSE.
(Described and priced on page facing)

EXTRA EARLY DOUBLE SWEET-SCENTED TUBEROSES.

We have again secured our stock from some large cultivators. The roots are unusually fine, and we would call particular attention to their low price, which places this charming flower within the reach of all.

They will be found invaluable for bouquets, ladies' dress, or as a coat flower. The perfume is exquisite, and the general appearance of the pure white double flower is most charming.

TIGRIDIA.

(Tiger or Shell Flower.)

Some beautiful hybrids of this showy flower have appeared during recent years. The bulbs, which are supplied in a dry state, are usually planted in pots in April, or in groups in the garden, in a rich sunny border. For outdoor culture they are generally potted in good mixed soil in autumn, and not over-watered during growth. They maintain a succession of bloom throughout the summer and early autumn.

DIELYTRA SPECTABILIS.

(The Bleeding Heart.)

A rosy pink flowering herbaceous plant. The roots we offer are supplied in a dormant state, and can be brought into flower very early in the spring if cultivated in pots and placed in moderate heat near the glass, just as the flower stems are showing. It is also an exceedingly decorative plant in the open border in the early summer.

Carters RAYNES PARK, LONDON, S.W.

CARTERS PERFUMES

are the sweet scents, carefully and skilfully prepared, of old-time favourite English Garden Flowers. They are highly concentrated, and do not, like inferior perfumes, become stale or stain fabrics.

Carters Night-Scented Stock Perfume

is exquisitely reminiscent of the marvellously perfumed little flower *Mathiola Bicornis*, which fills the garden on a summer's eve with its entrancing fragrance.

MRS. CORNWALLIS WEST writes of it — "It is exactly like the flower, and I can imagine myself in my summer moonlit garden, when on the coldest winter's day I have some of the scent on my handkerchief."

Carters Favourite Perfumes of English Garden Flowers are:—

GARDENIA	MIGNONETTE
HELIOTROPE	NIGHT-SCENTED STOCK
HONEYSUCKLE	RED ROSE
JASMIN	SWEET PEA
LILAC	WALLFLOWER
LILY OF THE VALLEY	VIOLET

Carters Perfumes are supplied in bottle, each being in a single dainty but inexpensive box (the value being in the perfume at the following prices:—
